

HUW code

Module

1. init
2. read parameter
3. notification
4. logging
5. check
6. measure

Init

read parameter

notification

logging

check

measure

environments

1. code lib
2. dev
3. prod

principles

Error management

module test

literals

naming

- LITERALS in capital letter
- variables in small letter, if one word only
- combinedVariables first word small, all later starting with a Capital letter
- Procedures strting with a capital letter

used abbreviations

1. idx: index
2. hum: humidity
